

Automation Studio is a tool to Create, Simulate, Animate, and Troubleshoot Circuits. It has libraries of thousands of symbols sorted by technologies ready to simulate along with ready-to-use components from Manufacturers' Catalogues. It also allows connecting with real devices such as PLCs, Arduino and more

Automation Studio

It is Perfect Software for the following types of simulations:

- Hydraulic circuit design and simulation <<
- Pneumatic circuit design
- Electro-hydraulic and electro-pneumatic <<
- circuit design
- Fluid Power component sizing <<
- Electrical control circuit design <<
- PLC control circuit design <<
